Reliability and High Performance

TASKI procarpet 30 has been designed with the reliability found on all our floor care machines. TASKI has developed this machine using our expertise in vacuum pick-up and chemical application to design a high performance carpet cleaning with excellent results.

Flexible Application

TASKI procarpet 30 allows users to select the cleaning application that best fits their needs based on turnaround time and soil levels. The machine can be set-up for deep cleaning extraction for heavy soils or restorative type cleaning application and also be set-up for interim cleaning using our specifically formulated encapsulation chemical.

Lower Total Cost of Ownership

The machine allows customers to control all carpet cleaning activities and select the application that best fits their needs. Utilizing interim cleaning will help to extend the time between deep cleaning activities keeping carpets looking better longer without extended dry times.

Simple and Easy to Use

The machine can be changed from deep extraction to interim clean simply by changing the chemicals and flipping a switch. The perfect balance point allows fatigue free working also for long working hours.

A large variety of accessories allows covering added cleaning tasks.
