

IntelliTrail Analytics

The Consultant and Fleet Manager right at your fingertips!

IntelliTrail Analytics is Diversey's latest innovation in the area of fleet management.

Are you struggling with too many systems, too much information and not knowing where to start? Then IntelliTrail Analytics is the perfect solution. It does the heavy-lifting for you!

It is designed to give you easy guidance and suggestions on how to improve your (multi-colour) machine fleet with approximate savings estimations that help you prioritize and realize savings.

Our analysis shows that you can save up to 20% of your machine operating cost (machine procurement, labor) if you use the tool effectively.

How does it work?

IntelliTrail Analytics continuously monitors the activity of your fleet and compares it to the recommended use of each and every machine. It is designed to detect anomalies and suggest a better-fit machine for the respective site.

Let's take the example of a swingo 1650 – a larger walk-behind scrubber drier.

It can have 3 statuses:

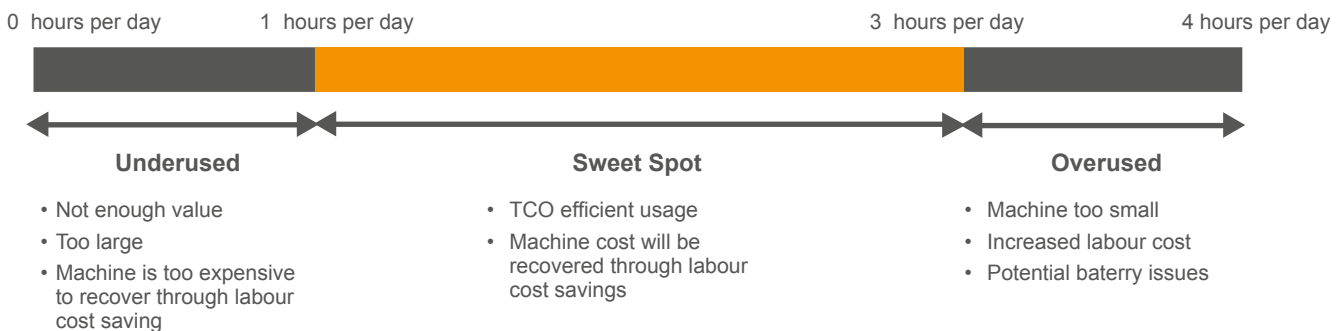

Underused: The machine is not used enough, and it will not recover the investment cost through labor savings – a smaller machine is much more effective

Sweet Spot: The machine usage is efficient and a good fit for the site

Overused: The machine is used too much, and it will increase your labour cost compared to a larger machine

IntelliTrail Analytics tries to make recommendations based on a machine's usage and gives an estimation of savings.

1. How does it work? Let's take a swingo 1650

IntelliTrail Analytics

The Consultant and Fleet Manager right at your fingertips!

If under or over-utilization is detected, the system will automatically suggest the right-sized machine for the site and show a savings estimation:

Sites Summary **Machines savings & utilization**

Search:

Site	City	Machine	Number	Status last 180 days	Status last 28 days	Inception	Last cleaning	Mean daily usage last 28 days	Mean daily usage last 180 days	Recommendation	Projected amount of unclaimed savings	Explanation
UTRECHT, Herculeslaan 1	UTRECHT	swingo 755	301374224	Overused	Underused	2016-10-17	2019-07-15	0min	48min	Upgrade to: swingo 1850	\$6,175.00	
UTRECHT, Herculeslaan 1	UTRECHT	swingo 755		Overused	Overused	2016-10-17	2019-08-29	52min	68min	Upgrade to: swingo 955	\$3,829.00	

Service Level Agreement Import: It also allows an import of your service level agreement or planned usage through the IntelliTrail standard features: Time Plan and Thresholds so that it becomes even more accurate.

IntelliTrail Analytics are available for all IntelliTrail customers with more than 100 machines.
