The ULTIMATE
Cleaning Machines

ULTIMAXX solutions for improved infection prevention
and safety for your patients and the public

The logo consists of the word "TASKI" in a white, sans-serif font, enclosed within a solid orange square.

ULTIMAXX

At TASKI we work hard to understand your critical business needs

Brand Protection

You know a clean and hygienic establishment is highly valued by your patients and the public. Creating a safe and hygienic environment is fundamental to protecting your patients' welfare whilst also safeguarding your brand. Transform your cleaning, mechanise more of your floor cleaning, time to get serious about hygiene!

Resident Experience

First impressions count, so transform the appearance of floors in resident rooms, wards and washrooms. With TASKI, your patients will really notice the difference. ULTIMAXX scrubber driers deliver exception hygiene standards but also class leading water pick for safer floors. That means more time for what really matters, looking after your patients.

Infection Prevention

At TASKI we have a reputation for excelling in both cleaning results and ergonomics. We design our machines to be easy to clean and disinfect. Features such as easy access to recovery tanks, easy to clean yellow maintenance points and tool free accessories all add up to a higher frequency of cleaning and superior hygiene. We are known for our patented squeegees. Cleaner, drier floors = safer floors. ULTIMAXX brings new levels of indoor air quality with the optional HEPA filters to H13 standard.

People & Safety

We know you have a duty of care to improve hygiene, air quality and floor safety. At TASKI we pay great attention to ensure our machines are ergonomically designed for the user. Folding and fully adjustable handles or steering wheels mean user comfort is assured. Intuitive dashboard with common icons means little training is needed. Our simple to use machines and on-line training aids makes training new team members easy. Having the best water pick up means less stops, less re-cleans and more importantly less risk of slip falls.

Cost Control

TASKI machines are designed to quickly pay for themselves, we know total cost of ownership is more important to you than simple purchase price. TASKI Solutions make your money work harder, reduce total cost of ownership and deliver great ROI. For complete peace of mind opt for one of our combined finance and service packages for fixed monthly costs from 1 to 5 years. Protect your assets with TASKI Service for reduced downtime, longer working life and improved residual value. Our comprehensive 25 x service checks will ensure your machine fleet is always fit for purpose, ready and safe for use.

The full force of TASKI

TASKI **ULTIMAXX**

Introducing the new ULTIMAXX scrubber range, the next generation of ULTIMATE cleaning machines.

These machines set a new benchmark in design, construction and performance. They bring you integrated modular brush deck technology and a new set of features delivering cleaning excellence.

ULTIMAXX scrubbers by TASKI empower your organization to increase efficiency, reduce costs and improve cleaning results.

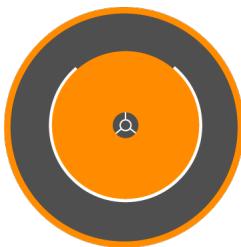

Better, stronger and smarter.

ULTIMATE FLEXIBILITY, MAXIMUM PRODUCTIVITY

The all new TASKI ULTIMAXX range offers a wide range of possibilities to meet the highest expectations.

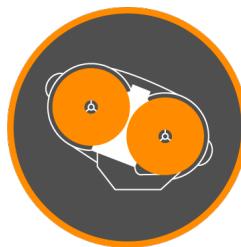

This new level of modularity allows you to customize the machine for your cleaning process with flexible selections for working width and brush decks.

Brush decks: Single disc | Dual disc | Dual disc TWISTER PLUS | Dual cylindrical with hopper | Orbital rectangular.

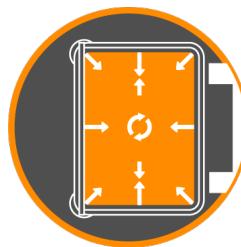

SINGLE DISC

The new single disc deck has direct gear construction, significantly improving length of use combined with perfect water distribution for reliably high cleaning standards.

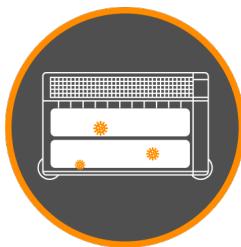

DUAL DISC

Dual disc technology allows high productivity in combination with excellent cleaning results. The offset dual disc brush decks allows simple, water-efficient close-to-wall cleaning. Also

ORBITAL

Deep cleaning and top stripping made easy with robustly designed orbital head technology that minimises vibration. Combined with TWISTER diamond pads, the orbital deck becomes a chemical-free, multipurpose deck.

DUAL CYLINDER WITH HOPPER

The new ultra-robust dual cylinder roller brush deck sweeps and cleans in a single pass, reducing the need for pre-sweeping on structured floor surfaces.

Signature features created with you in mind.

TASKI **ULTIMAXX**

Our customers drive our business, it's part of our success. TASKI products are constructed with the highest quality components and are designed to last.

Intelligent solutions to your business needs.

IntelliZone

Predefine your cleaning application for areas where special attention is key. The programming of all parameters can be done within few minutes and access levels can also be protected. The IntelliZone will be displayed direct at the main dashboard at the touch screen.

IntelliTouch

The new TASKI IntelliTouch is a multi-surface touch screen allowing advanced scrubber operation, showing key elements such as speed and area cleaned. The interface can be customized to have key functions directly accessible and the cleaning programs can be pre-defined, with one touch the right settings are put in place. Color coded information illustration makes sure that the user is always in full control.

IntelliKey

The new IntelliKey uses smart NFC technology and access rights for users can be pre-defined, protecting the machine against misuse.

IntelliBac

To care and protect people TASKI offers the ULTIMAX scrubber range in a special IntelliBac version where the plastic tank material has a special antibacterial effect inside and outside of the machine.

IntelliTrail – Remote & IntelliPredict

IntelliTrail - Remote allows two way communication to cloud services. The telemetry module is directly linked to the electronics and a new level of proactive service that will deliver the next level of uptime.

- Remote service
- Battery management
- Full service history recorded
- Predictive service

Yellow maintenance points

TASKI was the first to introduce easy to recognize yellow maintenance points for the operators to maintain. Cleaned regularly they collectively reduce preventable callouts by as much as 50%. Clean water: prevents blockages in water flow. Squeegee: yellow no-tool click mechanism to easily remove. Recovery solution filter: collects larger debris to reduce blockages. Air filter: extends vacuum motor life. Easily remove/clean to increase water recovery. HEPA Filter: improves air quality.

Whisper motor technology

Patented technology included as standard for the ultimate in power and ultra-quiet operation. This unique airflow system guarantees optimized suction and immediate noise absorption. The operation is extremely quiet with 63db(A) and with the eco mode it can reach as low as 60db(A).

HEPA Filter

HEPA H13 Filters you can be assured the air is reliably filtered removing 99.95% of all particles larger than 0.3 µm (micron). Captures particles and pollutants such as pollen, even microorganisms such as bacterial and fungal spores. Suitable for high risk areas and for general superior air quality.

Patient experience

1. Whisper patent - low noise/energy motors minimises disruption to patients without loss of performance.
2. Eco mode - energy saving low noise setting. Also minimises disruption to patients.
3. IntelliFlow - safe water flow = reduces risk of slips.
4. HEPA Filter - H13 efficient particulate filters improve air quality especially for high risk patients.
5. IntelliBac - antimicrobial tanks help to reduce the risk and unpleasant odours from unclean tanks.
6. Cleaning excellence - more cleaning pressure, more soilage removed, more water removed for visibly cleaning, safer and more hygienic floors.

People & safety

1. IntelliKey - smart NFC technology. Without the key the machine remains in safe anti tamper mode.
2. IntelliTouch/IntelliZone - interactive touch screen and connectivity for video tutorials and help menus give direct to support safe use.
3. IntelliFlow - safe water flow = less slips.
4. IntelliDose - safe chemical dosing = no exposure to chemicals.
5. IntelliBac - antimicrobial tanks reduce risk of microorganisms and cross contamination.
6. HEPA Filter - H13 efficient particulate filters improve air quality for patients and employees.

Brand protection

1. IntelliKey - smart NFC technology. Only authorised users. Tamper proof.
2. IntelliTouch/IntelliZone - interactive touch screen. Help menus give direct to support safe use and minimise misuse.
3. IntelliTrail - next generation telemetry and digital ecosystem driven through connectivity. 24/7 oversight of your entire fleet. Full asset management.
4. IntelliDose - safe chemical dosing. Rescue risk to public and employees.
5. Twister Mode - one touch of a button, the machine directly adjust the speed and water settings for perfect results. Simple & safe.
6. HEPA Filter - H13 efficient particulate filters to reduce risk to patients and employees.

Cost control

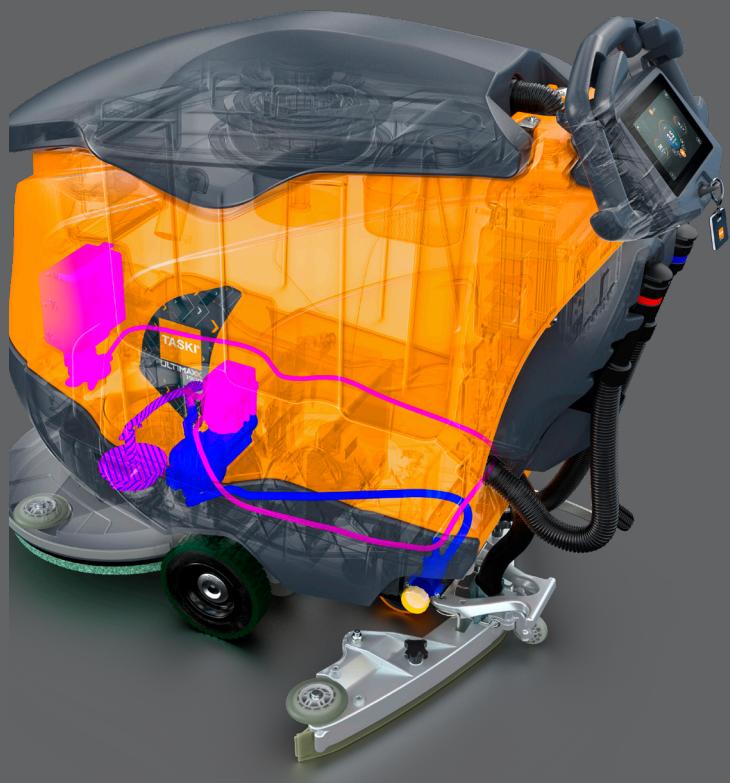

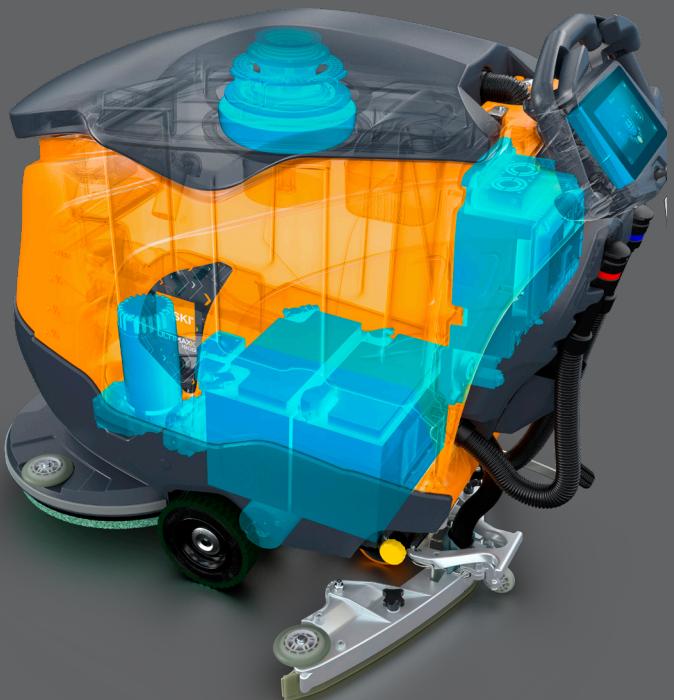

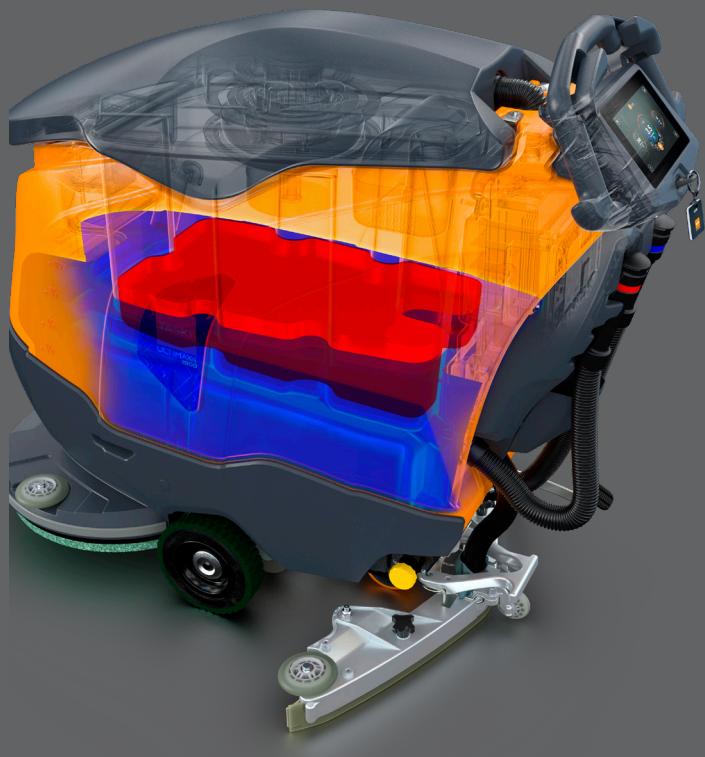

1. IntelliTrail - improve productivity, save labour, optimise your fleet.
2. IntelliPredict - state-of-the-art electronic technology, connecting and controlling all electronic parts to facilitate low cost remote service.
3. IntelliDose - accurate chemical dosing. 0% wastage. 90% reduction in packaging.
4. Twister Mode - one pass cleaning. Reduction in time and chemicals.
5. IntelliPower - fast charging, longer lifespan, maintenance-free lithium batteries. More Range. Multiple charges per day. 25% TCO savings. Lower service costs.
6. IntelliScrub - allows you to dynamically adjust the brush pressure, extending battery operation time by more than 40%.

Infection protection

1. IntelliBac - antimicrobial tanks help reduce risk.
2. HEPA Filter - H13 efficient particulate filters improve air quality for patients, especially high risk patients.
3. Tank design - tanks designed to be easier to clean, keep clean and disinfect.
4. IntelliDose - accurate chemical dosing for perfect cleaning results and superior hygiene.
5. Yellow maintenance points - colour coded easy to check/clean critical maintenance points.
6. IntelliTrail - next generation telemetry and digital ecosystem driven through connectivity.

ULTIMAXX scrubber driers are packed full of Intelligent Solutions. Take a look inside and you will find technologies, patents, smart designs and clever engineering, all with the purpose of addressing the challenges you face.

TASKI®

ULTIMAXX

TASKI is one of four core areas of the Diversey business.
