

TASKI® ULTIMAXX

Hospitality

ULTIMAXX solutions for an improved guest experience, reduced impact on the environment and protection for your brand.

TASKI The ULTIMATE Cleaning Machines

TASKI®

ULTIMAXX

At TASKI we work hard to understand your critical business needs

Guest Experience

You work hard to create a memorable experience for your guests and you know how much they value a clean and hygienic establishment. First impressions count so make the change and mechanise your floor cleaning, it will transform the appearance of your floors. Your guests will really notice the difference which will keep them coming back.

Sustainability

As a responsible business you will have sustainability goals, your clients may also have expectations. Sustainability doesn't only mean Green, at TASKI it's Orange. Sustainability is at the heart of everything we do, it comes naturally to us. We have Intelligent Solution technologies to reduce utilities up to 76% to meet sustainability goals. Even our smart motors are designed to reduce energy consumption. ULTIMAXX scrubber driers are designed to deliver energy, water and chemical savings. We can even help you share these savings with your clients.

Asset Protection

You are proud of your establishment, your reputation means everything. Protect your valuable floors, carpets and fabrics while improving appearance. We'll help you boost your TripAdvisor score. TASKI machines will keep public areas immaculate and your guest bedrooms and washrooms spotless. TASKI ultra compact scrubber driers will keep kitchen and food preparation areas hygienic and safe ensuring they pass any audit.

People & Safety

We know you have a duty of care to protect your team and the public to improve hygiene, air quality and floor safety. At TASKI we pay great attention to ensure our machines are ergonomically designed for the user. Folding and fully adjustable handles or steering wheels means user comfort is assured. Intuitive dashboard with common icons means little training is needed. New ULTIMAXX scrubber driers are available with HEPA filters for superior air quality. We are known for our patented squeegees. Having the best water pick up means less stops, less re-cleans plus most importantly, less risk of slip falls.

Operational Efficiency

TASKI machines will increase your operational efficiency through our innovation, superior productivity and fleet management tools. At TASKI we have a reputation for excelling in both cleaning results and productivity. Designs such as self-adjusting squeegee and easy-to-clean yellow maintenance points all add up to more available cleaning time. Our designers and engineers challenge convention, they optimise and innovate to achieve the ULTIMATE in cleaning excellence.

The full force of TASKI

Introducing the new ULTIMAXX scrubber range, the next generation of ULTIMATE cleaning machines.

These machines set a new benchmark in design, construction and performance. Integrated modular brush deck technology and a new set of features deliver cleaning excellence.

ULTIMAXX scrubbers by TASKI empower your organization to increase efficiency, reduce costs and improve cleaning results.

Better, stronger and smarter.

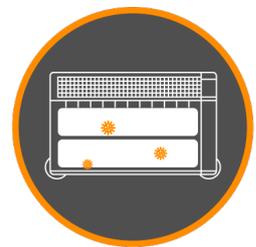

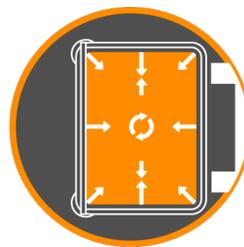

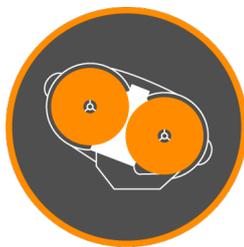

ULTIMATE FLEXIBILITY, MAXIMUM PRODUCTIVITY

The all new TASKI ULTIMAXX range offers a wide range of possibilities to meet the highest expectations.

This new level of modularity allows you to customize the machine for the cleaning process with a flexible selection of working width and brush decks.

Brush decks: Single disc | Dual disc | Dual disc TWISTER PLUS | Dual cylindrical with hopper | Orbital rectangular.

SINGLE DISC

The new single disc deck has direct gear construction, significantly improving length of use combined with perfect water distribution for reliably high cleaning standards.

DUAL DISC

Dual disc technology allows high productivity in combination with excellent cleaning results. The offset dual disc brush decks allows simple, water-efficient close-to-wall cleaning. Also available as TWISTER version.

ORBITAL

Deep cleaning and top stripping made easy with robustly designed orbital head technology that minimises vibration. Combined with TWISTER diamond pads, the orbital deck becomes a chemical-free, multipurpose deck.

DUAL CYLINDER WITH HOPPER

The new ultra-robust dual cylinder roller brush deck sweeps and cleans in a single pass, reducing the need for pre-sweeping on structured floor surfaces.

Signature features with you in mind.

Our customers drive our business, it's part of our success. TASKI products are constructed with the highest quality components and are designed to last. Intelligent solutions to your business needs.

Whisper motor technology

Patented technology included as standard for the ultimate in power and ultra-quiet operation. This unique airflow system guarantees optimized suction and immediate noise absorption. The operation is extremely quiet with 63db(A) and with the eco mode it can reach as low as 60db(A). Minimal disruption for your guests.

HEPA Filter

HEPA H13 Filters you can be assured the air is reliably filtered removing 99.95% of all particles larger than 0.3 µm (micron). Captures particles and pollutants such as pollen, even microorganisms such as bacterial and fungal spores. Suitable for high density public spaces or for prestigious establishments looking for superior indoor air quality for their guests.

IntelliBac

To care and protect people TASKI offers the ULTIMAXX scrubber range in a special IntelliBac version where the plastic tank material has a special antibacterial effect inside and outside of the machine. Choose IntelliBac even higher standards of hygiene for your guests and for your brand protection.

IntelliTouch

The new TASKI IntelliTouch is a multi-surface touch screen allowing advanced scrubber operation, showing key elements such as speed and area cleaned. The interface can be customized to have key functions directly accessible and the cleaning programs can be pre-defined, with one touch the right settings are put in place. Color coded information illustration makes sure that the user is always in full control.

IntelliDose+

Precise direct dosing for Diversey high concentrate pouches or standard chemicals. The new design is completely integrated into the machine and can be controlled via the machine dashboard. Dosing can be locked dosing settings or link specific dosing settings within the IntelliTouch user interface. No exposure to chemicals. Reduced risk to public and employees.

IntelliPower

Fast Charging - 2hrs not 10hrs. Partial charges will not damage the batteries. Maintenance-free. Multiple charges per day possible. TCO & Efficiency 25% savings on machine + battery. Increased efficiency +4%. Lower service costs. Less frequent replacements, less engineer visits delivering big savings for you.

Yellow maintenance points

TASKI was the first to introduce easy to recognize yellow maintenance points for the operators to maintain. Cleaned regularly they collectively reduce preventable callouts by as much as 50%. Clean water: prevents blockages in water flow. Squeegee: yellow no-tool click mechanism to easily remove. Recovery solution filter: collects larger debris to reduce blockages. Air filter: extends vacuum motor life. Easily remove/clean to increase water recovery. HEPA Filter: improves air quality.

Sustainability

1. IntelliFlow/IntelliDose - up to 70% reduction in water consumed. 0% chemical wastage and 90% reduction in packaging.
2. Eco mode - energy saving low noise setting. Also minimises disruption to the public.
3. Twister Mode - reduction in chemicals and packaging.
4. IntelliPower - 5x faster charging. Maintenance free. Less frequent replacements. Less engineer visits delivering big savings for you.
5. Whisper digital motors - smaller, lighter, more efficient motors use less energy and need next to no maintenance. Much lower carbon footprint.
6. IntelliPredict - from reactive to proactive and will reduce engineer visits reducing carbon footprint.

Patient experience

1. Whisper patent - low noise/energy motors minimises disruption to patients without loss of performance.
2. Eco mode - energy saving low noise setting. Also minimises disruption to patients.
3. IntelliFlow - safe water flow = reduces risk of slips.
4. HEPA Filter - H13 efficient particulate filters improve air quality especially for high risk patients.
5. IntelliBac- antimicrobial tanks help to reduce the risk and unpleasant odours from unclean tanks.
6. Cleaning excellence - more cleaning pressure, more soilage removed, more water removed for visibly cleaning, safer and more hygienic floors.

People and Safety

1. IntelliKey - smart NFC technology. Only authorised users. Tamper proof.
2. IntelliTouch/IntelliZone - interactive touch screen. Help menus give direct support for safe use and minimise misuse.
3. IntelliTrail - next generation telemetry and digital ecosystem driven through connectivity. 24/7 oversight of your entire fleet. Full asset management.
4. IntelliDose - safe chemical dosing. Rescue risk to public and employees.
5. Twister Mode - one touch of a button, the machine directly adjusts the speed and water settings for perfect results. Simple & safe.
6. HEPA Filter - H13 efficient particulate filters to reduce risk to customers and employees.

Operational efficiency

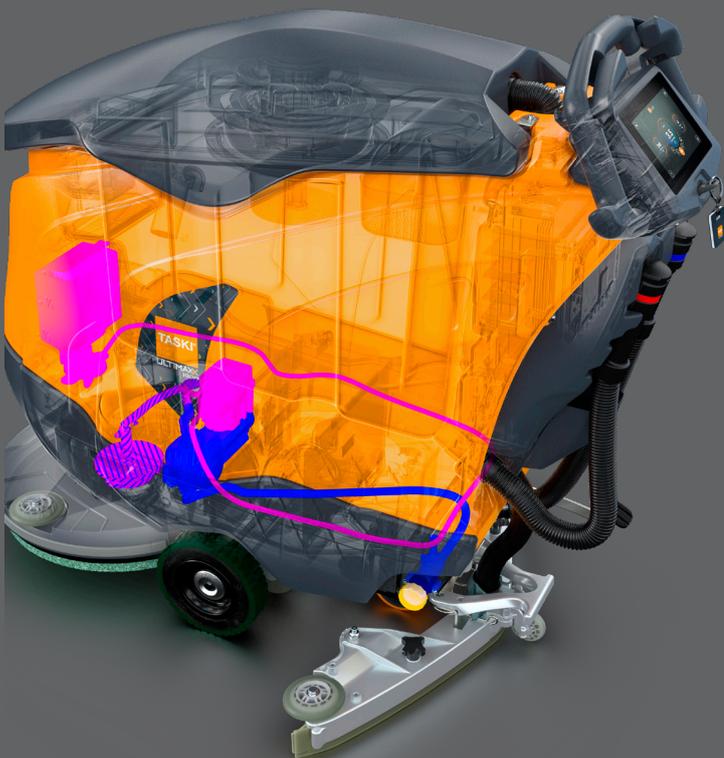

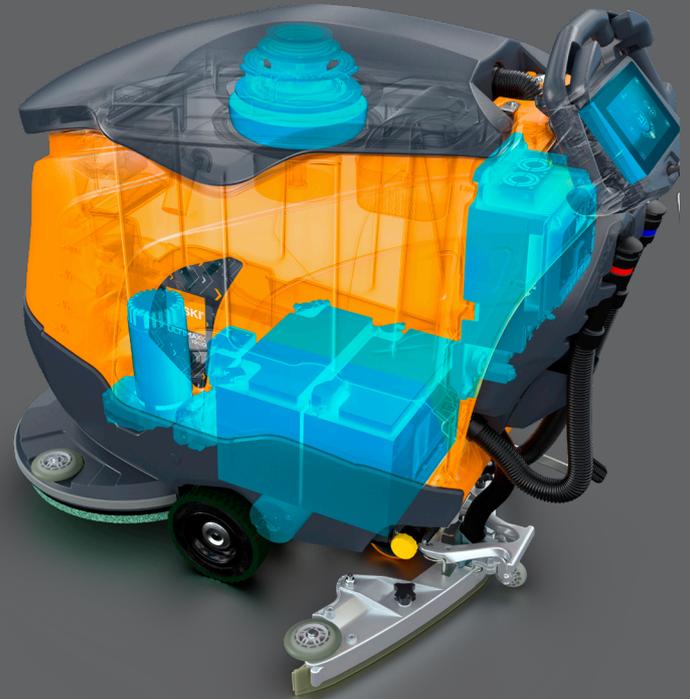

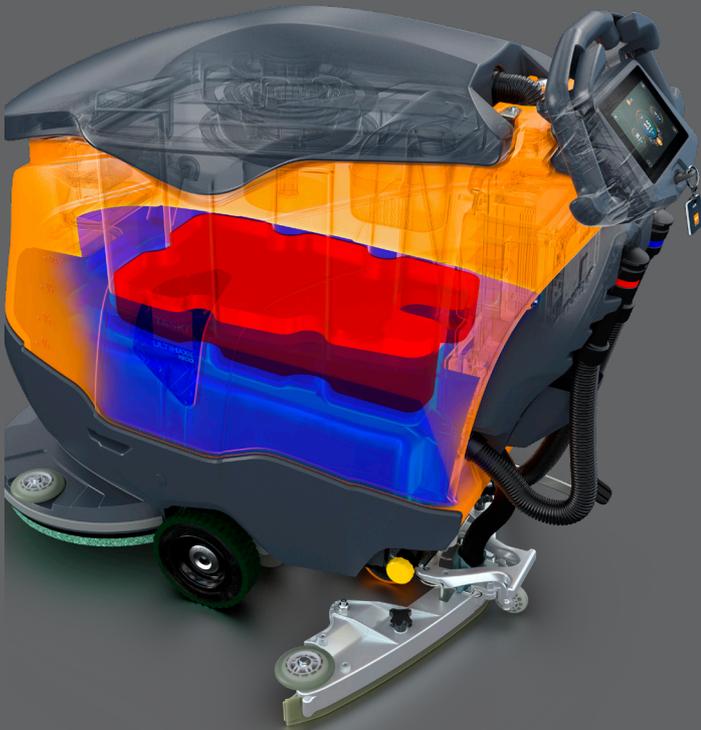

1. IntelliTrail - improve productivity, save labour, optimise your fleet.
2. IntelliPredict - state-of-the-art electronic remote service to minimise downtime.
3. Cylindrical roller brush option - up to 30% productivity increase by eliminating pre-sweeping completely.
4. Twister mode - the only manufacturer with fully integrated settings. One touch of a button, the machine directly adjusts settings for perfect results with shine levels normally associated with specialist applications.
5. IntelliPower - fast charging, longer lifespan, more range. Plug and go. Always ready.
6. IntelliFlow - speed dependent solution results in up to 50% saving of cleaning solution versus conventional machines. Less tank refills means less unproductive time.

Brand protection

1. IntelliKey - smart NFC technology. Only authorised users. Tamper proof.
2. IntelliTouch/IntelliZone - interactive touch screen. Help menus give direct to support safe use and minimise misuse.
3. IntelliTrail - next generation telemetry and digital ecosystem driven through connectivity. 24/7 oversight of your entire fleet. Full asset management.
4. IntelliDose - safe chemical dosing. Rescue risk to public and employees.
5. Twister Mode - one touch of a button, the machine directly adjust the speed and water settings for perfect results. Simple & safe.
6. HEPA Filter - H13 efficient particulate filters to reduce risk to patients and employees.

ULTIMAXX scrubber driers are packed full of Intelligent Solutions. Take a look inside and you will find technologies, patents, smart designs and clever engineering, all with the purpose of addressing the challenges you face.

TASKI®

ULTIMAXX

TASKI is one of four core areas of the Diversey business.
