TASKI® The ULTIMATE
Cleaning Machines

ULTIMAXX solutions to help minimise disruption for
your business and help keep costs under control.

TASKI®

ULTIMAXX

At TASKI we work hard to understand your critical business needs

Operational Efficiency

ULTIMAXX scrubber driers will increase your operational efficiency through innovation, superior productivity and fleet management tools. At TASKI we have a reputation for excelling in both cleaning results and productivity. Designs such as self-adjusting squeegee and easy to clean yellow maintenance points all add up to more available cleaning time. Technologies such as IntelliScrub, IntelliPower and IntelliTrail deliver more time to focus upon your core business.

Profitable Growth

We understand cleaning isn't your core business. We know you need to control costs, by mechanising more of your cleaning we can help reduce time spent cleaning or do more with the labour you have to allow you to focus upon your core business. We have developed innovations and technologies with you in mind. ULTIMAXX does more with the time and resources you have. Brilliant technologies like the new cylindrical roller brush option. Up to 30% productivity increase by eliminating pre-sweeping completely.

People and Safety

We know you have a duty of care to protect your team and to improve hygiene, air quality and floor safety. At TASKI we pay great attention to ensure our machines are ergonomically designed for the user. Fully adjustable handles means user comfort is assured. Intuitive dashboard with common icons means little training is needed. ULTIMAXX scrubber driers are available with HEPA filters for superior air quality. We are known for our patented squeegees. Having the best water pick up means less stops, less re-cleans plus most importantly, less risk of slip falls.

Working Capital Optimisation

We want you to invest smartly. At TASKI we will help you make your money work harder. We can demonstrate how to improve your ROI and shorten you payback. Our finance options including leasing and rental means you can keep your capital for your priority business investments. ULTIMAXX scrubber driers are designed to quickly pay for themselves, we know total cost of ownership is more important to you than simple purchase price. Find out more.

The full force of TASKI

Introducing the new ULTIMAXX scrubber range, the next generation of ULTIMATE cleaning machines.

These machines set a new benchmark in design, construction and performance. Integrated modular brush deck technology and a new set of features deliver cleaning excellence.

ULTIMAXX scrubbers by TASKI empower your organization to increase efficiency, reduce costs and improve cleaning results.

Better, stronger and smarter.

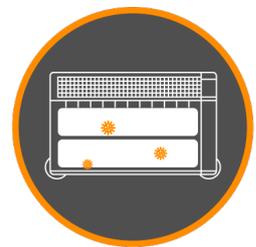

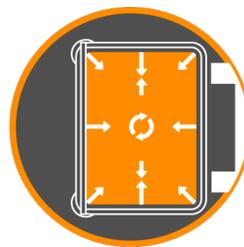

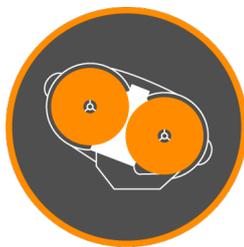

ULTIMATE FLEXIBILITY, MAXIMUM PRODUCTIVITY

The all new TASKI ULTIMAXX range offers a wide range of possibilities to meet the highest expectations.

This new level of modularity allows you to customize the machine for the cleaning process with a flexible selection of working width and brush decks.

Brush decks: Single disc | Dual disc | Dual disc TWISTER PLUS | Dual cylindrical with hopper | Orbital rectangular.

SINGLE DISC

The new single disc deck has direct gear construction, significantly improving length of use combined with perfect water distribution for reliably high cleaning standards.

DUAL DISC

Dual disc technology allows high productivity in combination with excellent cleaning results. The offset dual disc brush decks allows simple, water-efficient close-to-wall cleaning. Also available as TWISTER version.

ORBITAL

Deep cleaning and top stripping made easy with robustly designed orbital head technology that minimises vibration. Combined with TWISTER diamond pads, the orbital deck becomes a chemical-free, multipurpose deck.

DUAL CYLINDER WITH HOPPER

The new ultra-robust dual cylinder roller brush deck sweeps and cleans in a single pass, reducing the need for pre-sweeping on structured floor surfaces.

Signature features created with you in mind.

Our customers drive our business, it's part of our success. TASKI products are constructed with the highest quality components and are designed to last. Intelligent solutions to your business needs.

IntelliScrub / Cylindrical brush with debris hopper

The new IntelliScrub feature allows you to dynamically adjust the brush pressure, extending battery operation time by 30%. If the full brush pressure is not needed for light soilage levels, brushing pressure or the electronic brush unit version can be modified at the push of a button. This simple and quick feature is available as standard with all ULTIMAXX walk-behind scrubbers and still delivers better cleaning results than the market average. The new ultra-robust twin cylinder roller brush deck sweeps and cleans in a single pass. Very high RPM which "flick" soil from the surface into a hopper tray which holds debris preventing blockages. Pre-sweeping of most debris is not critical.

IntelliPower

Fast Charging - 2hrs not 10hrs. Partial charges will not damage the batteries. Maintenance-free. Multiple charges per day possible. TCO & Efficiency 25% savings on machine + battery. Increased efficiency +4%. Lower service costs. Less frequent replacements, less engineer visits delivering big savings for you. ULTIMAXX machines fitted with IntelliPower will always be ready whenever you need them.

IntelliTrail

Next generation telemetry and digital ecosystem driven through connectivity. Combines proven fleet management capabilities, new remote machine management functions. Empowers organizations to achieve measurable, transparent productivity improvements through the ultimate customer experience.

IntelliTrail – Remote & IntelliPredict

Allows two way communication to cloud services. Predictive maintenance is here where every component is flagged when a potential risk appears. From reactive to proactive and will reduce downtime to a minimum keeping the machine always ready.

- Remote service.
- Full service history recorded
- Battery management
- Predictive service

IntelliDose+

Precise direct dosing for Diversey high concentrate pouches or standard chemicals. The new design is completely integrated into the machine and can be controlled via the machine dashboard. Dosing can be locked dosing settings or link specific dosing settings within the IntelliTouch user interface. No exposure to chemicals. Reduced risk to public and employees.

Finance Solutions

TASKI offer a range of flexible finance options including leasing, rental and pool lease. TASKI Leasing Options are a suite of flexible and cost-efficient solutions to acquiring TASKI machines with the assurance of TASKI Service. Options available include: Hire purchase and Operating Lease. TASKI Rental answers the need of a growing trend for flexible access to machines for a shorter period without owning or leasing an asset. IntelliTrail Analytics is like having your own consultant and fleet manager right at your fingertips. If you have a large fleet, ask for more details about fleet management.

Operational efficiency

1. IntelliTrail - improve productivity, save labour, optimise your fleet.
2. IntelliPredict - state-of-the-art electronic remote service to minimise downtime.
3. Cylindrical roller brush option - up to 30% productivity increase by eliminating pre-sweeping completely.
4. Twister mode - the only manufacturer with fully integrated setting. One touch of a button, the machine directly adjust settings for perfect results with shine levels normally associated with specialist applications.
5. IntelliPower - fast charging, longer lifespan, More range. Plug and go. Always ready.
6. IntelliFlow - speed dependent solution results in up to 50% saving of cleaning solution versus conventional machines. Less tanks refills = less unproductive time.

People & safety

1. IntelliKey - smart NFC technology. Without the key the machine remains in safe anti tamper mode.
2. IntelliTouch/IntelliZone - interactive touch screen and connectivity for video tutorials and help menus give direct to support safe use.
3. IntelliFlow - safe water flow = less slips
4. IntelliDose - safe chemical dosing = no exposure to chemicals.
5. IntelliBac - antimicrobial tanks reduce risk of microorganisms and cross contamination.
6. HEPA Filter - H13 efficient particulate filters improve air quality for your products and employees.

Profitable Growth

1. IntelliTrail - improve productivity, save labour, optimise your fleet.
2. IntelliPredict - state-of-the-art electronic remote service to minimise downtime.
3. IntelliPower - fast charging, longer lifespan, More range. Plug and go. Always ready.
4. IntelliFlow - speed dependent solution results in up to 50% saving of cleaning solution versus conventional machines. Less tanks refills = less unproductive time.
5. Cylindrical roller brush option - up to 30% productivity increase by eliminating pre-sweeping completely.
6. IntelliDose - accurate chemical dosing. 0% wastage. 90% reduction in packaging.

Working Capital Optimisation

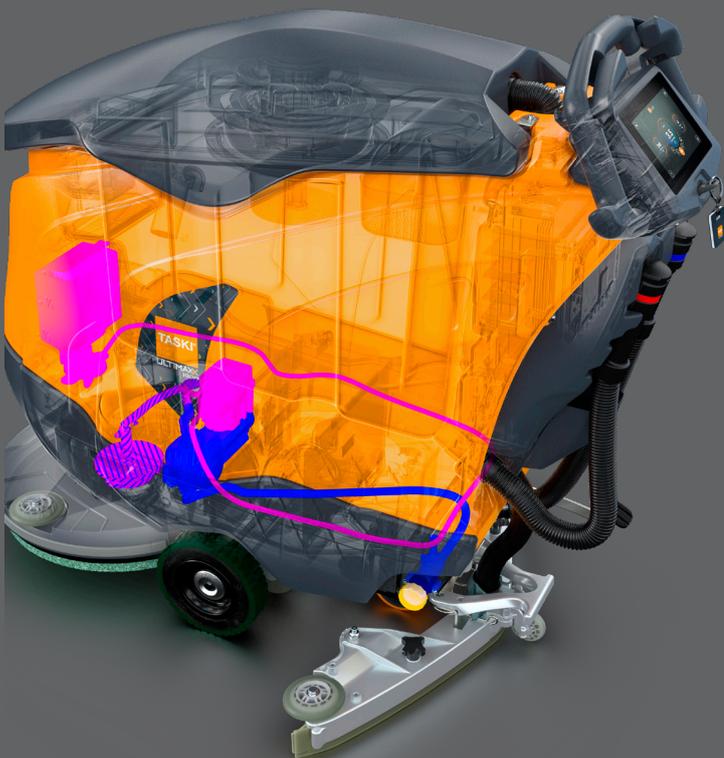

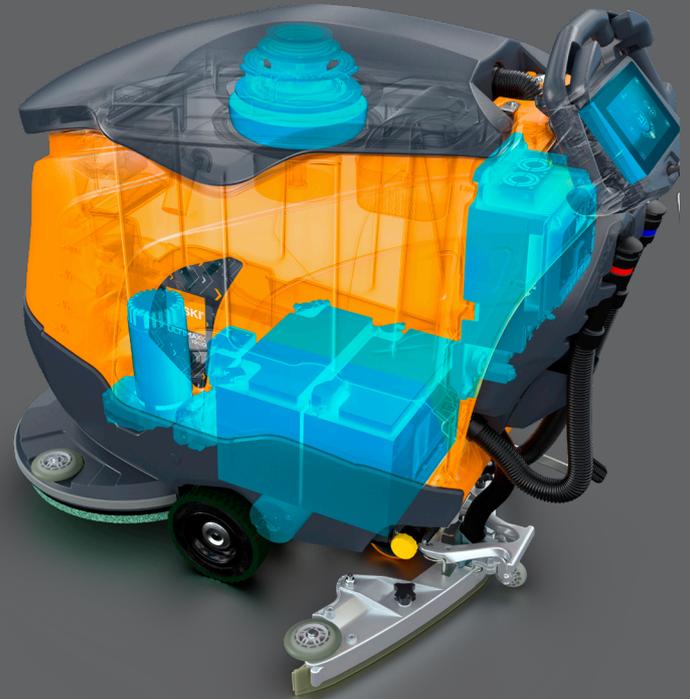

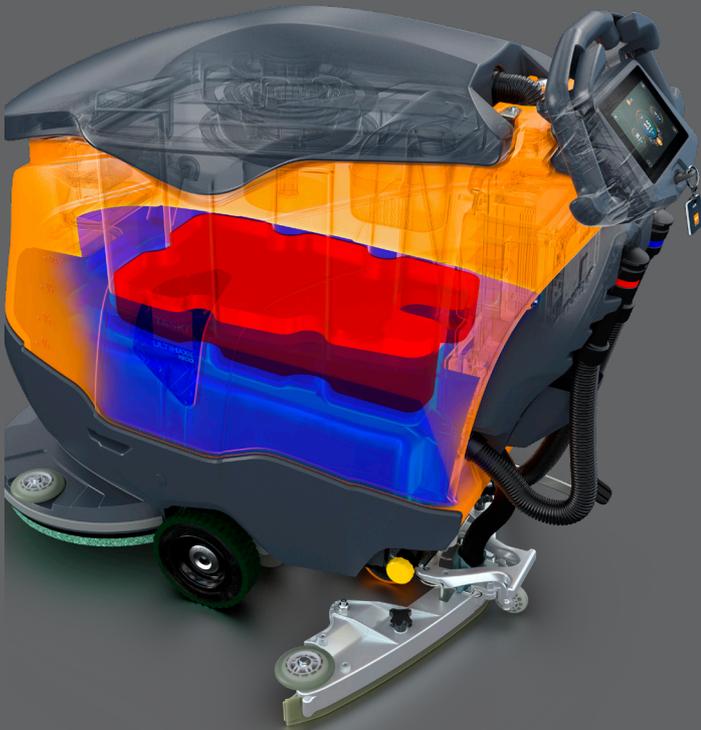

1. IntelliTrail - improve productivity, save labour, optimise your fleet.
2. IntelliPredict - state-of-the-art electronic remote service to minimise downtime.
3. IntelliPower - fast charging, longer lifespan, More range. Plug and go. Always ready.
4. IntelliFlow/ IntelliDose - up to 70% reduction in water consumed. 0% chemical wastage and 90% reduction in packaging.
5. Twister Mode - one pass cleaning. Reduction in time with or without chemicals.
6. Finance Solutions - purchase, leasing or rental fixed cost options with or without service to reduce TCO.

Cost control

1. IntelliTrail - improve productivity, save labour, optimise your fleet. Connected 24/7 for complete visibility.
2. IntelliPredict - state-of-the-art electronic technology, connecting and controlling all electronic parts to facilitate low cost remote service.
3. IntelliDose - accurate chemical dosing. 0% wastage. 90% reduction in packaging.
4. Twister Mode - one pass cleaning. Reduction in time with or without chemicals.
5. IntelliPower - fast charging, longer lifespan, maintenance-free lithium batteries. More Range. Multiple charges per day. 25% TCO savings. Lower service costs.
6. Finance Options - purchase, leasing or rental fixed cost options with or without service to reduce TCO.

ULTIMAXX scrubber driers are packed full of Intelligent Solutions. Take a look inside and you will find technologies, patents, smart designs and clever engineering, all with the purpose of addressing the challenges you face.

TASKI®

ULTIMAXX

TASKI is one of four core areas of the Diversey business.
