Retail

**TASKI** The ULTIMATE  
Cleaning Machines

ULTIMAXX solutions for the retail sector, giving you improved customer experience and cost control.

TASKI®

# ULTIMAXX

## Customer Experience

You work hard to create a clean & safe shopping experience for your customers. You know how a clean and hygienic establishment is valued by your customers. First impressions count, make a change and mechanise more your floor cleaning, it will transform the appearance of your floors. Your customers will really notice the difference which will keep them coming back and stay loyal to your brand.

## Operational Efficiency

TASKI machines will increase your operational efficiency through our innovation, superior productivity and fleet management tools. At TASKI we have a reputation for excelling in both cleaning results and productivity. Designs such as self-adjusting squeegee and easy to clean yellow maintenance points all add up to more available cleaning time. Our designers and engineers challenge convention, they optimise and innovate to achieve the ULTIMATE in cleaning excellence.

## Cost Control

TASKI machines are designed to quickly pay for themselves, we know total cost of ownership is more important to you than simple purchase price. TASKI Solutions make your money work harder, reduce total cost of ownership and deliver great ROI. For complete peace of mind opt for one of our combined finance and service packages for fixed monthly costs from 1 to 5 years. Protect your assets with TASKI Service for reduced downtime, longer working life and improved residual value. Our comprehensive 25 x service checks will ensure your machine fleet is always fit for purpose, ready and safe for use.

## People & Safety

We know you have a duty of care to protect your team and customers to improve hygiene, air quality and floor safety. At TASKI we pay great attention to ensure our machines are ergonomically designed for the user. Folding and fully adjustable handles or steering wheels mean user comfort is assured. Intuitive dashboard with common icons means little training is needed. All our ULTIMAXX scrubber driers are available with HEPA filters for superior air quality. We are known for our patented squeegees. Having the best water pick up means less stops, less re-cleans but most importantly less risk of slip falls for your customers.

## Sustainability

As a responsible business you will have sustainability goals, your stakeholders may also have expectations. Sustainability doesn't only mean Green, at TASKI it's Orange. Sustainability is at the heart of everything we do. It comes naturally to us in TASKI. We have technologies which reduce utilities up to 76% to meet your business' sustainability goals. Our scrubber driers reduce energy, water and chemical consumption as well as reducing waste. These are savings we can help you share with your stakeholders.

# The full force of TASKI

## Introducing the new ULTIMAXX scrubber range, the next generation of ULTIMATE cleaning machines.

These machines set a new benchmark in design, construction and performance. Integrated modular brush deck technology and a new set of features deliver cleaning excellence.

ULTIMAXX scrubbers by TASKI empower your organization to increase efficiency, reduce costs and improve cleaning results.

Better, stronger and smarter.

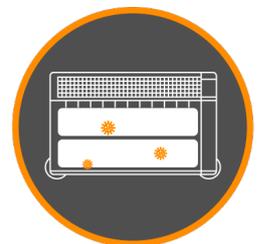

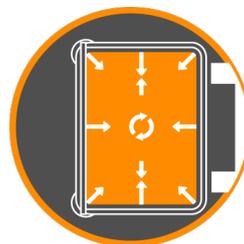

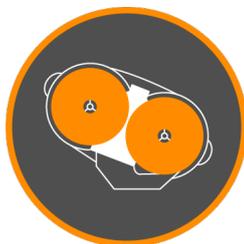

ULTIMATE FLEXIBILITY, MAXIMUM PRODUCTIVITY

## The all new TASKI ULTIMAXX range offers a wide range of possibilities to meet the highest expectations.

This new level of modularity allows you to customize the machine for the cleaning process with a flexible selection of working width and brush decks.

Brush decks: Single disc | Dual disc | Dual disc TWISTER PLUS | Dual cylindrical with hopper | Orbital rectangular.

### SINGLE DISC

The new single disc deck has direct gear construction, significantly improving length of use combined with perfect water distribution for reliably high cleaning standards.

### DUAL DISC

Dual disc technology allows high productivity in combination with excellent cleaning results. The offset dual disc brush decks allows simple, water-efficient close-to-wall cleaning. Also available as TWISTER version.

### ORBITAL

Deep cleaning and top stripping made easy with robustly designed orbital head technology that minimises vibration. Combined with TWISTER diamond pads, the orbital deck becomes a chemical-free, multipurpose deck.

### DUAL CYLINDER WITH HOPPER

The new ultra-robust dual cylinder roller brush deck sweeps and cleans in a single pass, reducing the need for pre-sweeping on structured floor surfaces.

# Signature features created with you in mind.

Our customers drive our business, it's part of our success. TASKI products are constructed with the highest quality components and are designed to last.

## Intelligent solutions to your business needs.

### IntelliZone

Predefine your cleaning application for areas where special attention is key. The programming of all parameters can be done within few minutes and access levels can be protected. The IntelliZone will be displayed directly on the main dashboard at the touch screen.

### IntelliTouch

The new TASKI IntelliTouch is a multi-surface touch screen allowing advanced scrubber operation, showing key elements such as speed and area cleaned. The interface can be customized to have key functions directly accessible and the cleaning programs can be pre-defined and with just one touch, the right setting put in place. The color coded information illustration makes sure that the user is always in full control.

### Twister

Twister Mode – TASKI is the only manufacturer with this feature. Fully integrated and optimized TWISTER setting. One touch of a button, the machine directly adjust the speed and water settings for perfect results. A high-speed function where cleaning and polishing are combined. This combination allows you to work with a standard speed but reach floor shine levels normally associated with specialist applications.

### IntelliScrub / Cylindrical brush with debris hopper

The new IntelliScrub feature allows you to dynamically adjust the brush pressure, extending battery operation time by 30%. If the full brush pressure is not needed for light soilage levels, brushing pressure or the electronic brush unit version can be modified at the push of a button. This simple and quick feature is available as standard with all ULTIMAXX walk-behind scrubbers and still delivers better cleaning results than the market average. The new ultra-robust twin cylinder roller brush deck sweeps and cleans in a single pass. Very high RPM which "flick" soil from the surface into a hopper tray which holds debris preventing blockages. Pre-sweeping of most debris is not critical.

### IntelliTrail – Remote & IntelliPredict

IntelliTrail - Remote allows two way communication to cloud services. The telemetry module is directly linked to the electronic and a new level of proactive service that will deliver the next level of uptime.

- Remote service.
- Full service history recorded
- Battery management
- Predictive service

### IntelliDose

The update to IntelliDose allows you to have precise direct dosing for Diversey high concentrate or standard. IntelliDose is completely integrated into the machine and can be controlled via the machine dashboard. Our unique approach maximizes effectiveness and simplifies your operation, taking your cleaning to a new level.

### IntelliScrub

The new IntelliScrub feature allows you to dynamically adjust the brush pressure which extends the battery operation time by more than 30%. If the full brush pressure is not needed for light dirt levels, pressure can be readjusted quickly and the machines reach is extended. This simple and quick feature is available as standard on all ULTIMAXX walk behind scrubbers.

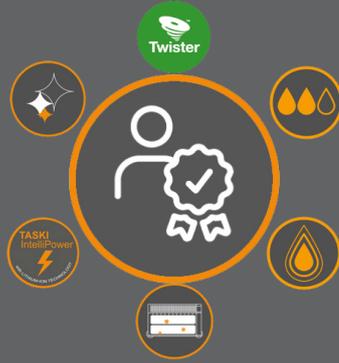

### IntelliFlow

With TASKI IntelliFlow solution flow technology, water and chemical consumption are optimized by 76% on daily floor cleaning. Clean longer with less downtime while using the precise amount of water and chemical for quality results. Ensure environmental and business operational sustainability with TASKI IntelliFlow.

### Customer experience

1. **Twister Mode** - perfect results with shine levels normally associated with specialist applications. the only manufacturer with a fully integrated setting.
2. **IntelliFlow** - speed dependent solution supply ensures the correct, safe amount of cleaning solution on the floor. Reduces slip risk.
3. **IntelliDose** - safe chemical dosing means no exposure to chemicals. Perfectly safe & hygienic floors.
4. **Cylindrical roller brushes** - suitable for use on uneven floors, where debris and higher soilage is present even where pre-sweeping is not possible. Cleaner floors.
5. **IntelliPower** - janitor machines always available for spillages. No downtime means lower risk of slips.
6. **Cleaning excellence** - more cleaning pressure, more soilage removed, more water removed for visibly cleaning, safer and more hygienic floors

### Cost control

1. **IntelliTrail** - improve productivity, save labour, optimise your fleet. Connected 24/7 for complete visibility.
2. **IntelliPredict** - state of the art electronic technology, connecting and controlling all electronic parts to facilitate low cost remote service.
3. **IntelliDose** - accurate chemical dosing. 0% wastage. 90% reduction in packaging.
4. **Twister Mode** - one pass cleaning. Reduction in time with or without chemicals.
5. **IntelliPower** - fast charging, longer lifespan, maintenance-free lithium batteries. More range. Multiple charges per day. 25% TCO savings. Lower service costs.
6. **Finance Options** - purchase, leasing or rental fixed cost options with or without service to reduce TCO.

### Operational efficiency

1. **IntelliTrail** - improve productivity, save labour, optimise your fleet.
2. **IntelliPredict** - state-of-the-art electronic remote service to minimise downtime.
3. **Cylindrical roller brush option** - up to 30% productivity increase by eliminating pre-sweeping completely.
4. **Twister mode** - the only manufacturer with fully integrated settings. One touch of a button, the machine directly adjusts settings for perfect results with shine levels normally associated with specialist applications.
5. **IntelliPower** - fast charging, longer lifespan, more range. Plug and go. Always ready.
6. **IntelliFlow** - speed dependent solution results in up to 50% saving of cleaning solution versus conventional machines. Less tank refills means less unproductive time.

### Sustainability

1. **IntelliFlow/IntelliDose** - up to 70% reduction in water consumed. 0% chemical wastage and 90% reduction in packaging.
2. **Eco mode** - energy saving low noise setting. Also minimises disruption to the public.
3. **Twister Mode** - reduction in chemicals and packaging.
4. **IntelliPower** - 5x faster charging. Maintenance free. Less frequent replacements. Less engineer visits delivering big savings for you.
5. **Whisper digital motors** - smaller, lighter, more efficient motors use less energy and need next to no maintenance. Much lower carbon footprint.
6. **IntelliPredict** - from reactive to proactive and will reduce engineer visits reducing carbon footprint.

### People and Safety

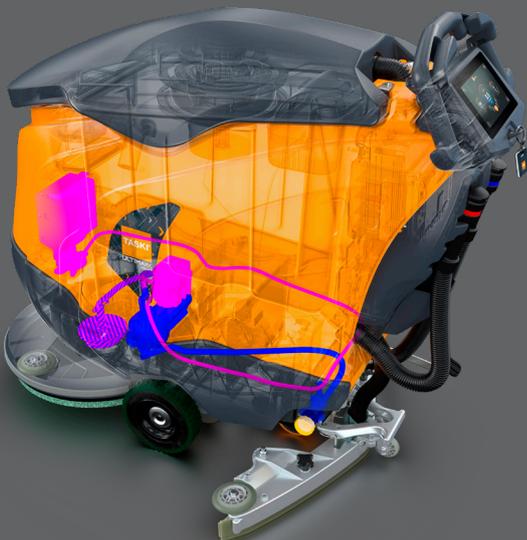

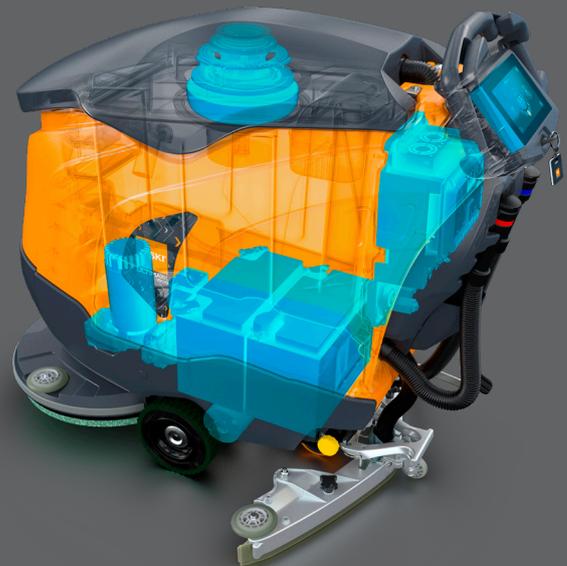

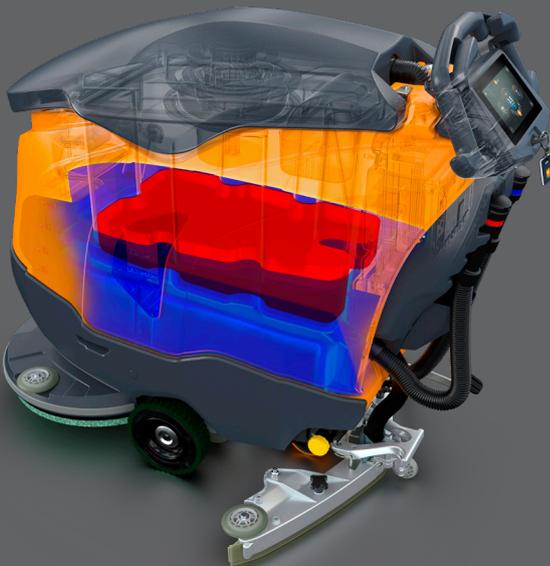

1. **IntelliKey** - smart NFC technology. Only authorised users. Tamper proof.
2. **IntelliTouch/IntelliZone** - interactive touch screen. Help menus give direct support for safe use and minimise misuse.
3. **IntelliTrail** - next generation telemetry and digital ecosystem driven through connectivity. 24/7 oversight of your entire fleet. Full asset management.
4. **IntelliDose** - safe chemical dosing. Rescue risk to public and employees.
5. **Twister Mode** - one touch of a button, the machine directly adjusts the speed and water settings for perfect results. Simple & safe.
6. **HEPA Filter** - H13 efficient particulate filters to reduce risk to customers and employees.

**Brand protection**

1. **IntelliKey** - smart NFC technology. Only authorised users. Tamper proof.
2. **IntelliTouch/IntelliZone** - interactive touch screen. Help menus give direct support for safe use and minimise misuse.
3. **IntelliTrail** - next generation telemetry and digital ecosystem driven through connectivity. 24/7 oversight of your entire fleet. Full asset management.
4. **IntelliDose** - safe chemical dosing. Rescue risk to public and employees.
5. **Twister Mode** - one touch of a button, the machine directly adjusts the speed and water settings for perfect results. Simple & safe.
6. **HEPA Filter** - H13 efficient particulate filters to reduce risk to customers and employees.

ULTIMAXX scrubber driers are packed full of Intelligent Solutions. Take a look inside and you will find technologies, patents, smart designs and clever engineering, all with the purpose of addressing the challenges you face.
