

TASKI®

The **ULTIMATE**
Cleaning Machines™

Hospitality

TASKI machine solutions for improved guest experience, reduced impact on the environment and protection for your brand.

Guest Experience

You work hard to create a memorable experience for your guests and you know how much they value a clean and hygienic establishment. First impressions count so make the change and mechanise your floor cleaning, it will transform the appearance of your floors. Your guests will really notice the difference which will keep them coming back.

Sustainability

As a responsible business, you want to reduce your impact on the environment. Sustainability doesn't only mean Green, at TASKI it's Orange. Sustainability is at the heart of everything we do. Reduced utilities means less energy, less water, less consumables, less chemicals. Our vacuums reduce energy consumption, saving as much as 40 Euros per year per vacuum. Our technologies all add up to help you meet your sustainability goals. By choosing TASKI we'll even help you share evidence proving you make sustainable choices for your guests.

Asset Protection

You are proud of your establishment, your reputation means everything. Protect your valuable floors, carpets and fabrics while improving appearance. We'll help you boost your TripAdvisor score. TASKI machines will keep public areas immaculate and your guest bedrooms and washrooms spotless. TASKI ultra compact scrubber driers will keep kitchen and food preparation areas hygienic and safe ensuring they pass any audit.

People & Safety

You want to protect your guests whilst safeguarding your brand. Scrubber driers apply 10 x more cleaning pressure, remove 5 x more soilage and 65% more water than a mop. We have ultra-compact battery scrubber driers to safely deal with spillages and cordless vacuums to ensure the highest hygiene standards. Less soilage = less germs. Less water = drier, safer floors that stay cleaner longer. Less dust means better indoor air quality for your guests. No cable to worry about means you can clean whenever. Time to switch to battery technology and throw away the mop!

Operational Efficiency

After a busy service and occupancy, make cleaning up effortless with our ultra-compact battery powered machines. Increase operational efficiency and spend less time cleaning. Our Li-Ion powered vacuums and ultra-compact scrubber driers save time in guest bedroom and bathrooms cleaning. That means more time for what really matters, looking after your guests and guaranteeing their return.

Signature products created with you in mind.

Our customers drive our business, it's part of our success. TASKI products are constructed with the highest quality components and are designed to last.

Innovate and improve your operational efficiency and bottom line.
Manage your fleet remotely, do more with your time.

IntelliPower

The power of lithium battery technology

- Latest lithium batteries for TASKI scrubber driers
- 30% reduction in total cost of machine and battery
- 3x faster charging
- 4x longer battery life

IntelliTrail

Optimise your fleet

- Complete asset visibility
- Maximise ROI
- Maximise up time
- Save up to 15% of the asset value in labour

IntelliTrail Analytics

Your virtual fleet manager

- Predictive analytics
- Automates fleet improvement suggestions
- Quantifying opportunities to save labour and investment costs
- Save up to 20% of your machine operating cost

Unlock the potential of automated floor cleaning.
Take your productivity to a new level while redeploying your labour for higher priority tasks.

ECOBOT 50 Pro

Autonomous scrubbing & drying robot

- State-of-the-art autonomous cleaning robot
- Up to 1,800 m²/hr scrub and drying for perfect cleaning of hard floors
- Sensor array for superior navigation
- Cutting-edge technology such as LiDAR, cameras, and state-of-the-art sensors to guarantee safety
- Full autonomy enabled by work & docking station for a peace of mind operation
- Improved total cost of cleaning by reducing labour
- Water recycling system for improved sustainability

ECOBOT 40

Autonomous sweeping & vacuuming robot

- State-of-the-art autonomous cleaning robot
- Combines vacuuming, sweeping and dust-mopping in one unit
- Up to 1,200 m²/hr autonomous cleaning for both carpets and hard floors
- Powerful suction performance for perfect dust and debris collection
- Completely hands-free operation for improved total cost of cleaning
- Cutting-edge technology such as LiDAR, cameras, and state-of-the-art sensors to guarantee safety

PHANTAS

Autonomous scrubbing, vacuuming, sweeping & mopping robot

- State-of-the-art autonomous cleaning robot
- Combines scrubbing, vacuuming, sweeping and dust-mopping in one unit
- Unique size makes it perfect for daily cleaning in small/ congested areas
- Scrubs up to 200m² on a single tank / 33cm working width
- 8 L dust bag / 41cm working width
- Up to 10hr/12hr running time in mopping/sweeping mode
- Best-in-class navigation

Transform your cleaning for improved productivity & cleaning excellence. Mechanise your floor cleaning - time to throw away the mop! Your guests will notice and your housekeeping team will really appreciate it.

swingo 150B

Your first step into mechanised cleaning. An ultra-compact scrubber drier.

swingo 250micro

micro scrubber drier

swingo 350B

Small and compact scrubber drier

- Lightweight and agile
- Height adjustable handle
- 3L tank and 33cm working width
- Removes water and soilage working forward and backwards
- Lithium battery for cable-free cleaning
- Scrubs and dries leaving floors spotless and dry

- Brilliant replacement for mopping
- 44cm working width / 1320m²/hr productivity
- 140RPM twin contra rotating brushes
- Fully adjustable water flow for +- 600m²/tank
- 80mins run time / 1hr recharge time
- Enhanced Sustainability - made from a minimum 20% recycled plastic content

- Roller brush and offset for edge cleaning
- Height-adjustable handle
- 10L tank and 38cm working width
- Removes water and soilage working forward and backwards
- Lithium battery for cable-free cleaning
- Scrubs and dries leaving floors spotless and dry

ULTIMAXX 900

Small scrubber drier

- High productivity 1650m²/hr
- 22L tank and 43cm to 55cm working widths
- Lithium battery for cable-free cleaning
- Height-adjustable handle for agility and storage
- Scrubs and dries leaving floors spotless and dry
- Rotary, roller brush or orbital brush decks

ULTIMAXX 1900

Medium walk -behind scrubber drier

- High productivity 2925m²/hr
- 43L tank and 43cm to 65cm working widths
- Lithium battery for cable-free cleaning
- Power driven & height adjustable for reduced fatigue
- Scrubs and dries leaving floors spotless and dry
- Rotary, roller brush or orbital brush decks

Our range of vacuums means you can keep your carpet and floors always looking their best. Make a step change in vacuum productivity, upgrade to upright and even ride-on vacuums. Free up time for tasks that add value to your customers and your bottom line.

AERO 8 FLEXX

Powerful battery tub vacuum

- Latest Li-ion battery and digital motor technologies
- 90 min run time / 60 min recharger time (80%)
- Exceptional suction power
- Ultra silent cleaning experience
- High filtration (Optional HEPA H13 or H14)
- Less energy consumption (up to 20%)

AERO UP 30/38

Cable and battery upright vacuums

- Versatile and durable upright vacuums for a wide range of cleaning tasks
- Roller brush technology delivers a powerful mechanical action for a better/deep cleaning
- Battery option for maximum flexibility and versatility
- Unbeaten battery autonomy of up to 1h 20 min for unparalleled productivity
- 3-stage filter system (HEPA included) for superior air quality

AERO BP

Cable & battery backpack vacuum

- Superior efficiency, results and air quality
- Battery options for ultimate agility and productivity
- 1hr run time / 1.5hr recharge time
- Superior airflow and low noise
- High filtration (HEPA option)
- Remote control

Jet 38/50

Cable upright vacuums

- Make the change to upright vacuums
- Wider working width for improved productivity (up to >50% than tub vacuum)
- Additional brush activation for better/deeper cleaning
- High filtration (HEPA option) for superior air quality

AERO 3500micro

Ride-on vacuum-sweeper

- Huge productivity (3500m²/hr)
- Twin brush for excellent cleaning results
- Large vacuum bag for expanded capacity
- Lithium batteries for long run time and reliability
- Extending accessories and hose for operational efficiency
- TASKI whisper patent and 3 stage filtration system for low noise level and highest indoor air quality

HEPA Filters

Improve indoor air quality with superior vacuum filters

- Improve air quality in one simple low-cost step
- HEPA removes 99.95% of particulates <0.3 microns
- All TASKI dry vacuums are available with HEPA Filters
- Good filtration = good IAQ. Better filtration = better IAQ

Improve your customer satisfaction scores and occupancy rates. Insource periodic tasks to impress your guests and improve your bottom line. Our simple to use machines and training aids makes upskilling your team easy. Twister diamond pads will make your business shine!

**Ergodisc FLEXX/
Vacumat 22T**

Specialised machines for all floor care tasks

Balimat sweepers
for indoor and outdoor use

Aquamat 10/20
Ideal for spot cleaning
and upholstery

Procarpet 30/45
Large carpet cleaning
machines for carpet and fabrics

• Heavy duty & robust rotary machines • Cordless multiple speed ergodisc option for ultimate flexibility & freedom • Powerful lithium battery and super fast charger • Heavy duty & robust wet vacuums • Comprehensive accessories for all tasks	• Battery powered sweeper range for indoor and outdoor use • Perfect sweeping result on various floor types • Patented Tandem roller system • Easy and simple to use whenever it's needed • Extended productivity due to extra wide working width	• Extraction for deep cleaning • Effective combination of extraction and exceptional suction • Exceptional pay-back and ROI vs outsourcing	• TASKI procarpet machines are 2-in-1 • Unique encapsulation method for intermediate maintenance • Foam method for fast drying • Minimal disruption / downtime
