

Twister Diamond Floor Pads - Hybrid Series

Key Benefits

- Impressive honing performance
- Restore your floor instead of replacing it
- No more orange peel effect
- Enhances the Twister upgrade procedure

Description

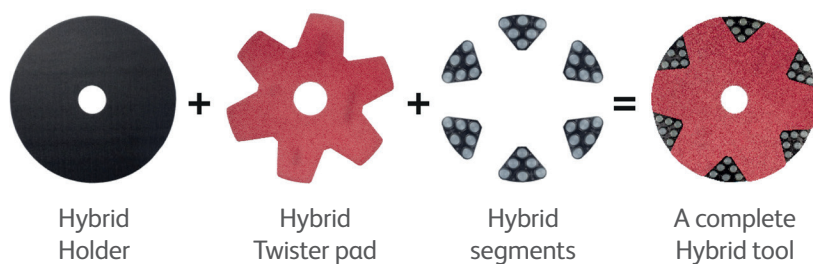

The Twister Hybrid™ system gives new life to damaged and heavily worn natural stone and terrazzo floors. Easy to use and environmentally friendly, the Hybrid gives you an opportunity to remove stains, scratches and “orange peel” using only standard cleaning machines and water. Restore your floor instead of replacing it!

Twister Hybrid Tool Black is the coarsest of segments. It removes deep scratches, lippage, excessive wear and staining.

Twister Hybrid Tool Red removes scratches, wear and staining. It prepares the floor for further improvement with Twister.

Hybrid Description

Twister Hybrid tools consist of three different items; the Hybrid Holder, the Hybrid Twister (Star pad) and the Hybrid Black and Red segments. The pad and the holder are available in the following sizes: 17” and 20”. The segments are sold in boxes containing six segments.

Twister Diamond Floor Pads - Hybrid Series

Instructions for use

- Best effects are achieved on standard floor machines > 90 lbs. (40 Kg). If used with an auto scrubber it must have adequate down pressure of > 120 lbs. (55 Kg) and move no faster than 2 mph (3 Km/h).
- Water is necessary in order to easily remove the slurry. Use a wet/dry vacuum or an auto scrubber to pick up the slurry.
- Apply water during the first pass and keep wet during the process. Remove slurry after each step in the renovation process. Rinse the Twister Hybrid pad between each step.
- On a smooth surface it can take some time before the diamonds are exposed and start to cut. You can speed this process up by using it on a rougher surface first.
